SURVEY

UWHC – Smart IV Pumps

One year after the implementation...

Letter to UWHC Healthcare Providers

Dear UWHC healthcare provider,

A group of UW-Madison researchers are studying the impact of smart IV pump technology on work and quality of working life. This survey is part of the effort to evaluate the technology before and after its implementation and subsequent use.

You received the initial survey before the Smart pumps were implemented, and we are now sending you the survey one year following implementation. Your response for each survey round is appreciated.

Participation in the study is voluntary, and there is no requirement for you to be a participant. If you agree to participate in the study, we ask that you complete the following questionnaire, which will tell us about your job, your quality of working life, your perceptions of the technology and your performance. The questionnaire will only take about 15 minutes to fill out. When responding to the questionnaire, you may leave blank any questions you do not want to answer.

No one at your work place will ever see your answers. Your responses are strictly confidential and will be closely guarded. My students, research staff and I will be the only people to ever see your answers. All reports from this study will use combined responses from all of the participants so that no one person can be identified. No answers of individuals or small groups of individuals will ever be released.

It is our hope that through the information we obtain from this study, we can better understand how the smart IV pump technology affects healthcare providers. Thank you for your consideration.

Sincerely,

Professor Pascale Carayon

Instructions

When completing the questionnaire, you can leave blank any questions that you do not want to answer. Remember that your responses are strictly confidential and will be closely guarded. This questionnaire has been designed to gather information about the work you do, the technology you use, and your quality of working life. Please try to answer all of the questions.

To answer the questions, circle the appropriate response on the scale. For example:

How satisfied are you with the computer you use?
Not Satisfied ←————→ Very Satisfied
1 2 3 (4) 5 6 7

Some questions will require answers similar to the scales above, while other questions will require different responses. Please try to be as accurate as possible.

We appreciate the time you are taking to complete this questionnaire and hope that the information will help us better understand how new technology influences people.
