Pre-Visit Questionnaire

This is a short questionnaire in preparation for our site visit. In the questionnaire we ask you questions about the socio-technical characteristics of your practice. Socio-technical characteristics include patient or provider characteristics, physical environment and layout, technical training and support, functionality and usability of health IT technologies, worker roles and communication flows.

Please try to answer all of the questions. Your responses will be kept confidential to the extent permitted by law, including Section 944(c) of the Public Health Service Act. 42 U.S.C. 299c-3(c). That law requires that information collected for research conducted or supported by AHRQ that identifies individuals or establishments be used only for the purpose for which it was supplied.

We appreciate the time you are taking to complete this questionnaire and hope that the information will help us better understand how new technology influences people.
